ABOUT ME

I build the web systems that businesses actually run on: clinic records, hotel bookings, shop inventory, rental fleets. Every project is a complete PHP and MySQL application with user accounts, an admin dashboard and a layout that works on any screen. I work with clients in both Amharic and English, and I stay close to help after launch so they can run things on their own. Open to remote freelance work worldwide.

EXPERIENCE

Freelance Full-Stack Web Developer

Remote | Addis Ababa

- Shipped **13 web projects**, from simple business sites to full database-driven management systems.
- Built logins, user roles and admin dashboards so clients can manage content, bookings, stock and orders themselves.
- Handle hosting, databases and deployment from start to finish, and keep supporting clients after launch.
- Build responsive layouts that work on phone, tablet and desktop.

SELECTED PROJECTS

ProClinic – Hospital and clinic system for patient records, appointments and billing.

[Live demo](#) • [GitHub](#)

ProHotel – Hotel booking with live room availability, a restaurant page and an admin panel.

[Live demo](#) • [GitHub](#)
